Description:

A giant, that's for sure!
Unique. That's how redwood trees can be described best. Because in nature some of this giants grow higher than 100 meters and thus, regarding the height, are unrivaled. Our new EUROPALMS redwood chestnut tree doesn't reach these unbelievable proportions of course, but with a size of 2.8 meters it's also unique among artificial chestnut trees and it's solely available here. But it's not only the size which is convincing. It's also the exquisitely worked leaves and branches which satisfy the highest demands. The exclusive chestnut tree once again shows that there is almost no difference between original and copy - considering the look and the atmosphere conveyed.
