Description:

The inflatable ensemble of Europalms is a complete cemetery scene. Whether in your front yard or at an event, it's certainly a stunning effect as the center of your Halloween decoration.

Two white ghosts seem to whizz through the bare branches of the lost tree, while the owl majestically sits on a large branch. The scene is completed by a tombstone and three pumpkins with grim faces. A special effect is created by the discreetly illumination of the owl, ghosts, pumpkins and gravestone by cool white LEDs from the inside. The IP44 protection class - splash-proof - enables easy installation in sheltered outdoor areas.

It's easy like that:

For operation permanently connect the ensemble to the power supply via a 1.70 m long supply cable. It then inflates on its own to its full size.

For a stable stand always attach and fix the enclosed anchoring cords at ground level at the front and back as well as halfway up the tree.

Features:

- Complete cemetery scene enlightened with cool white LEDs
- Figurine glowing
- Easy to assemble
- Self-inflating
- Space-saving storing
