Description:

Something stirs in the dark. With what appears to be the last of her strength, a figure drags itself slowly, crawling but inexorably across the floor. Crawling Mathilda is no ordinary appearance, but a disturbed creature, caught between childlike innocence and dark horror. As a gruesome decorative figure, she unfolds her full potential in haunted houses or as a shock moment at any Halloween party.

Is it her pale face, marked by painful memories, that makes every visitor's blood run cold? A large, spider-shaped scar is emblazoned on her forehead, while other scars run ominously across Mathilda's entire face. Long black hair enhances the contrast to her pale skin and unnatural blue LED eyes create a hypnotizing, almost ghostly effect.

Mathilda is dressed in an old-fashioned red and black striped dress that completely conceals her body.

As the zombie figure crawls forwards through a built-in mechanism, her claw-like hands seem to tirelessly grope for support. At the same time, an eerie audio file can be heard, adding to the spooky atmosphere.

The animation of the reclining figure is activated via an integrated microphone or with a wired control. Please make sure you have enough space, as this Halloween figure needs a larger radius of action to be effective.
