Description:

For centuries, countless legends have surrounded the gravedigger. Once the final companion of the deceased, he carried out his work under the cover of darkness. It is no surprise that his eerie image continues to send chills down the spine and has become a lasting figure in countless ghost stories.

Standing up to 2.85 meters tall, this animated Halloween figure by EUROPALMS looks as though it has stepped straight out of an old cemetery legend. Beneath a black hat, long strands of white hair fall over its shoulders, framing a blue-gray face with a devilish grin and weathered features. Its outfit, consisting of a white shirt, a dark red vest, and a long black tailcoat draped with a brown cape, is reminiscent of the attire worn by nineteenth-century undertakers. In its pale hands, it grips a large grave shovel, the most recognizable tool of its grim profession. As soon as the animation is activated, the gravedigger slowly comes to life. Its body rises menacingly to a height of up to 2.65 meters before gradually lowering again. At the same time, its eyes flash an intense red while a sinister voice echoes through the darkness. Accompanied by maniacal laughter and ominous music, the scene creates the chilling impression that the cemetery has sent back its eternal guardian.

With an animation cycle of up to 35 seconds, this towering figure delivers unforgettable scares and becomes an unmistakable focal point in any Halloween display.
