Description:

Carnivorous plants have fascinated people for centuries. In nature, they usually trap small insects, but in the world of horror, they become terrifying creatures that seem to be waiting for their next victim.

This animated carnivorous plant looks as though it has emerged straight from a dark, abandoned greenhouse. Rising from a twisted trunk wrapped in dark vines is a menacing flower head with a wide-open mouth and sharp, fang-like jaws. Dark leaves and wildly hanging fibers enhance the appearance of an overgrown creature that is anything but harmless.

As soon as the animation is activated, the plant's head sways restlessly from side to side while its jaws open and close. LEDs inside the mouth change color, giving the creature an even more sinister appearance. Accompanied by eerie sound effects, it creates the chilling illusion that the plant is snapping at its prey. The height of the plant can be adjusted manually, allowing for flexible staging, from a lurking predator to a towering horror centerpiece.

With an animation cycle of up to 55 seconds, this animated carnivorous plant becomes a striking scare attraction for any Halloween display.
